

MEDISMART⁺

The Comprehensive Hospital Management System
(As web based and client server based solution)

MediSmart covers a wide range of hospital administration and management processes for the provision of high quality health care services to patients eliminating unnecessary waiting time, unreliable information and tedious paperwork.

MediSmart provides the benefits of streamlined operations, enhanced administration and control, prompt response to patient care, cost control, and improved profitability. It enables intelligent flow of information on patient care to support diagnosis and treatment services. Integrates all departments in the hospital that results in enhanced availability of timely and accurate information across departments, greater organizational flexibility, easier resource management, minimal inventory levels, reduced wastage and reduced waiting time at the counters for patients and help health professionals and staff to focus on patient care.
