

# FotoPass comes with a host of features and advantages, including:

## Features

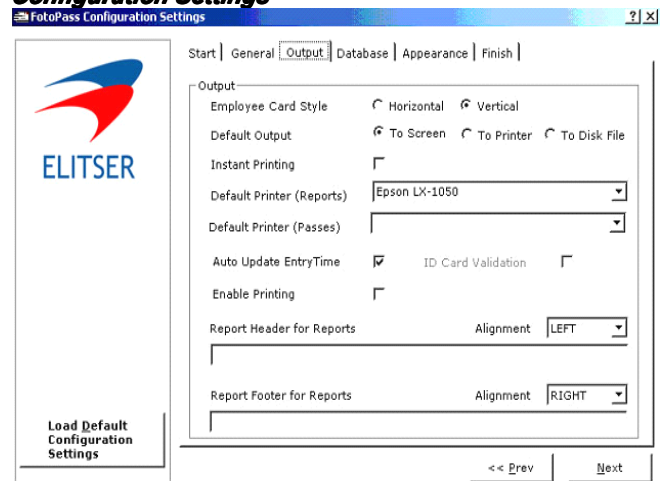

- Simple and easiest ways of capturing details of visitors
- Captures not just textual information but also photograph and signature
- Passes are generated at a rapid speed with photograph
- Passes are barcoded for security and movements of visitor will be recorded through barcode readers placed at entry and exit points. Manual updation is supported in case reader failure
- Optional facility to approve entry of the visitors by authorized official
- Faster generation of passes for frequent visitors
- Prints employee ID cards too, is an added feature, user can choose one of two predefined ID formats
- Customizable user-interface (colors, mandatory fields etc.), shortcut key definition for frequently used features
- Software does not delete entries permanently from the database which provides security to vital data, can be recalled by administrator
- Identification details (Photograph, Sign) will be maintained in database in encrypted format, no physical files will be available
- Facility to trace visitors still in the organization premises, with valid passes, expired passes (out of their allowed period)
- Backup reminders on prescheduled dates
- Uses Microsoft Internet Explorer web browser for previewing reports, does not demand any third party report generation tool, hence reduces client expenses on software
- Optional Messenger software at official desk, gives alerts on issuing passes to meet him

## Pass Issuing System

- Re-usable ID Cards can also be used as identity, if the user has such existing environment. Then entry and exit updation can be made based on ID card.
- Gate passes can be generated for the tracking of goods that are being taken outside the premises, and records returned goods on its return, if issued goods are of type returnable.
- Photo Search facility enables user to find details of the visitors through their photograph.
